

CyberSIEM Security Report

Type: Daily Security Summary | Scope: 2026-06-10 00:00:00 to 2026-06-11 16:11:53 | Generated: 2026-06-11 16:11:54

1. Executive Summary

During the reporting period from 2026-06-10 00:00:00 to 2026-06-11 16:11:53, CyberSIEM monitored host security logs, network sockets, firewall profiles, USB storage endpoints, and system resource metrics. A total of **45** Windows security/system logs were processed. The event correlation engine registered **4672** total alerts, including **0** CRITICAL severity alerts and **1374** HIGH severity alerts requiring immediate response.

2. Threat Statistics & Alerts

Severity	Triggered Count	Status Description
Critical	0	Immediate actions sent via Email
High	1374	Urgent operational investigations
Medium	3246	Standard monitoring metrics
Low	52	Informational logs / audit marks

3. Operational Monitoring Summary

Monitoring Component	Metric Summary
Failed Login Attempts (Event ID 4625)	8 attempts detected
File Integrity Modifications (FIM)	2953 file modifications logged
USB Storage Device Events	0 insertions/removals
Windows Defender Firewall Events	0 policy state shifts

4. Recent High/Critical Threats Details

Time	Severity	MITRE ATT&CK;	Details
2026-06-11 10:41:09	High	T1134 - Access Token Manipulation	Privilege Escalation Detected: Special privileges assigned (Event ID 4672) to user logon. Message: Special privileges assigned to new logon. Subject: Security ID: S-1-5-21, Account Name: admin. Privileges: SeSecurityPrivilege, SeBackupPrivilege, SeRestorePrivilege, SeTakeOwnershipPrivilege, SeDebugPrivilege
2026-06-11 10:40:03	High	T1496 - Resource Hijacking	Critical overall system RAM consumption: 91.8%

2026-06-11 10:39:55	High	T1496 - Resource Hijacking	Critical overall system RAM consumption: 90.8%
2026-06-11 10:39:47	High	T1562.001 - Impair Defenses: Disable or Modify Tools	Process Terminated: 'svchost.exe' (PID: 23428) exited or was killed.
2026-06-11 10:39:47	High	T1496 - Resource Hijacking	Critical overall system RAM consumption: 90.6%
2026-06-11 10:39:29	High	T1562.001 - Impair Defenses: Disable or Modify Tools	Process Terminated: 'svchost.exe' (PID: 27088) exited or was killed.
2026-06-11 10:39:19	High	T1496 - Resource Hijacking	Critical overall system RAM consumption: 90.2%
2026-06-11 10:39:07	High	T1496 - Resource Hijacking	Critical overall system RAM consumption: 90.2%
2026-06-11 10:38:38	High	T1098.001 - Account Manipulation	User Account Deleted: Event ID 4726. Message: A user account was deleted. Subject: Security ID: SYSTEM, Account Name: admin. Target Account: Security ID: S-1-5-21-39, Account Name: temp_support
2026-06-11 10:38:34	High	T1562.001 - Impair Defenses: Disable or Modify Tools	Process Terminated: 'svchost.exe' (PID: 26996) exited or was killed.

5. Hardening & Security Recommendations

- **Failed Logins:** Monitor failed login sources. If failures target a specific user, enforce password resets or MFA policies.
- **USB Hardware Restrictions:** Restrict USB mass storage devices via Windows Group Policy Objects (GPO) to prevent data exfiltration.
- **File Integrity:** Regularly audit modifications in critical application directories. Investigate any unapproved execution files.
- **Firewall Profile Stability:** Ensure public/private host firewall states are maintained as 'ON'. Auto-remediate disabling actions.
